

## **Mary Pert**

### Waxing and Finishing

#### My Role at Renstrom

Mary does the polishing for all of the gold and porcelain fused to metal crowns. She designs full contour wax ups of gold crowns and then does the finishing for them as well. She is also skilled in working in the casting area if needed.

#### Highlights of my career

- Had the opportunity in my career to take on waxing full contour crowns.
- With 36 years of working in dental technology I have learned many new techniques and processes that have allowed me to excel in what I do.

#### My Renstrom Mission

I always pay close attention to details and the instructions of each doctor. I make sure that any problems are properly corrected before the case is sent out. I take pride in the work that I do because I can complete each step including waxing, casting, and finishing. Knowing the entire process helps me design a quality crown that will deliver the best result. When I fabricate each crown I always have the patient's best interest in mind because it is so important that their expectations are met.
