

Richard Renstrom

Vice President

My role at Renstrom/Crocus

It is likely that you will find Rick at his bench where he checks each case before it is sent to the doctor. He oversees quality control and makes certain that all work meets the doctor's specifications. When not checking out work or providing guidance to other team members he is involved in the day to day business activities and decisions made at the lab.

Advanced dental lab training

- Comprehensive Surgical and Restorative Implant Treatment, Nobel Biocare
- Certified Dental Technician
- Associates in Arts degree

My Renstrom/Crocus Mission

I would like for Renstrom Dental and Crocus Dental to be known for its personal communication and dedication to serving the doctors and their patients. By being attentive to the feedback doctors provide we can consistently deliver top quality restorations which will reduce chair time for the doctor and bring satisfaction to the patient.
