

Sherry Scheller

Ceramist

My role at Renstrom

Sherry works in the porcelain area designing natural looking crowns to resemble actual teeth. She starts each process by building and layering porcelain which adds contour to the crown. The final step consists of applying any stains for additional color and then a glaze before the final firing. Sherry also schedules all of the cases, assigning each doctors work with the ceramist suitable for the case.

Advanced Dental Lab Training

- Participant at the annual dental meeting in Chicago, Illinois
- Continuously learned new skills as a ceramist, primarily working with Randy and also Moni

My Renstrom Mission

My goal as a ceramist is to improve my skills and capabilities to design quality crowns, eliminating the doctor's headaches of making adjustments. I also feel that it is important for me and the other technicians to maintain close working relationships with the doctors we work with. By doing this we can easily communicate any questions or concerns that may arise while working on a case.
