Course One

**Dental Photography Training
Hands-On Course**

**Presenter: Rick Spaulding
Nationally Recognized Digital
Dental Photography Trainer**

Many dental offices have attended seminars on dental photography, and many practices have purchased a dental camera, intending to use photography to better communicate with their patients, dental laboratories and insurance companies. But many offices don't have a camera, and many that do are using their camera infrequently, or not at all. For over nine years, Rick Spaulding has given presentations about the benefits of photography for dental practices, and many of you have seen him speak. This hands-on seminar will put a camera (yours or ours) in your hands, and Rick will show you how to take all the photos that are necessary to help Renstrom Dental Studio make the best possible esthetic restorations for your patients. You'll be amazed how easy it can be once you have a chance to practice your skills without the pressure of working on an actual patient .

Course Summary

- Seminar is for dental staff only-no doctors please
- Benefits of digital dental photography.
- Basic photographic techniques, image management and how to email photos to Renstrom.
- Hands-on dental photography practice, including:
 - when to take photos to get the best results
 - what images we need for top quality restorations
