

Digital Photography: An Essential Tool in the Dental Office

Featuring Rick Spaulding,
National Camera

Topics Covered will Include:

- Intro to Digital Photography and how it works
- Benefits of using Digital Photography
- Equipment recommendations and how to use them
- Example of a typical workflow:
 Shooting, Downloading, E-mailing
- Shooting table top products
- Storage and archiving
- Printing

In dentistry, digital photography can be an invaluable tool. There are several applications for digital photography in the office from shade communication and case creation capabilities between the office and the lab to case presentation and patient communication. This course will show you how get the most out of using a digital camera and how to put those photos to work in your dental practice. We **strongly encourage** dental assistants and staff to attend as well as the dentist!
