Course Three

**BETTER IMPRESSIONS
BITES AND MATRICES**

Presented by

Jeffrey L. Benson DDS

Dr. Benson recently retired from active practice and has joined the Renstrom team as a consultant and also teaches in the operative clinic at the University of Minnesota Dental School. He has a long standing interest in making quality impressions and in the creative use of dental materials to make restorative dentistry more reliable and efficient.

4225 White Bear Pkwy Suite 1240

Vadnais Heights, MN 55110-3349

612.407.0491 800.747.1321

For over 43 years, Renstrom Dental Studio has partnered with its doctors to produce the highest quality restorations possible. Our commitment to continuing education for our lab technicians and our doctors has been a big part of our success, and this series of assistants courses is the logical extension of that commitment. The previous assistant's courses focused on Photography and Shade taking. This course will focus on the assistant's role in collecting the clinical information necessary for Renstrom to produce restorations for your patients that are beautiful and functional. At Renstrom we believe that assistants should be performing all legal tasks for which they have been adequately trained. Busy practices often find it difficult to set aside time to provide the necessary training. This seminar will provide a starting point for staff to begin to perform some of the procedures now performed by the dentist, and provide some tips to help you with the tasks you already perform.
